## OBJECTIVES

- Cover the broad spectrum of endoscopic procedures in therapeutic upper digestive endoscopy and colonoscopy;
- Determine indications for endoscopic therapeutic procedures and discuss the adverse events of these procedures;
- Highlight the technical aspects of therapeutic upper and lower endoscopic procedures by disseminating the judicious analysis of these procedures in experimental pieces and models that simulate situations of daily clinical practice.
- Encourage the polishing of your skills through practical sessions of therapeutic endoscopic procedures.
- Describe in a practical and simple way the results after each of the procedures studied based on the medical evidence.

## EDUCATIONAL METHODS

- Theoretical and practical interactivity in experimental models of gastrointestinal diseasesLive and pre-recorded operative demonstrations
